

Hot Cat 1x12 Cabinet

Portable, Powerful and Versatile

The Bad Cat Hot Cat 1x12 cabinet is a mid-size, open back design built for perfect pairing with the Hot Cat Head or as an addition to the Hot Cat Combo. This 1x12 enclosure gives a surprisingly big, full sound for its size and comes loaded with our proprietary Celestion Bad Cat V30 speaker that sings with incredible detail and definition.

Best Cabinet Materials and Quality

The Hot Cat 1x12 Cabinet gives you the build quality, visual style, and high performance you expect from Bad Cat. Featuring Baltic Birch wood cab, and speaker baffle, elegant Taurus vinyl, silver piping, silver weave grille cloth, heavy gauge speaker wire, and hand-soldered jacks and speakers. Full tones, great bass response, and plenty of volume pair perfectly with your Bad Cat amplifier.

Premium Speaker for Detailed Tones

The single 12" Celestion Bad Cat speaker inside the Hot Cat 1x12 cabinet is not your run of the mill loudspeaker. This undoped 60-watt, 12" Celestion driver is perfectly voiced for all kinds of styles from glassy clean tones to massive crunch.

Plug your guitar amp into the Hot Cat cabinet and you'll experience your tone in a whole new way.
